***Allowable Subject Matter***

1. Claims 20-21 and 28-32 are allowed.
3. The following is an examiner's statement of reasons for allowance. The allowance is derived from previously indicated allowable subject matter.

***Claims 20 and 21 and 28***

The following is a statement of reasons for the indication of allowable subject matter: The prior art of Humpleman, Wang and Hansen all teach a process of communicating with devices on a network and presenting the information within an interface. The reason for indicating allowable subject matter is due to the combined features of the new dependent claims, when considered in independent form as containing all the limitations of the base claims. The prior art of Hansen, Humpleman and Wang teach displaying network appliances with indications of an assigned room and the descriptive information can include friendly names, however the combined limitations of the linked friendly name and UDN are stored in a table with the matching room information. The information is linked to a pointer that allows the display of all the different appliances in each room where the one appliance can be identified with the same friendly name can be located in multiple rooms. The added system claims 28-32 represent the system with an interface as described in claims 20 and 21 and therefore is allowable under the same rationale.

Therefore, the prior art does not suggest or disclose the claims as a whole and are allowed over the prior art.

***Claims 29-32***

These claims are dependent upon Claims 28 and are thus allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.
